

PROPOSED ABERDEENSHIRE LOCAL DEVELOPMENT PLAN 2020 RESPONSE FORM

As part of the production of the Local Development Plan, a 'Main Issues Report' was published in January 2019. The responses from these consultations have helped to inform the content of the Proposed Local Development Plan ("the Proposed Plan").

The Aberdeenshire Local Development Plan will direct decision-making on land-use planning issues and planning applications in Aberdeenshire for the 10-year period from 2021 to 2031. The Proposed Plan was agreed by Aberdeenshire Council in March 2020 as the settled view of the Council. However, the Proposed Plan will be subjected to an independent examination and is now open for public comment.

This is your opportunity to tell us if anything should be changed in the Proposed Plan, and why.

When writing a response to the Proposed Plan it is important to specifically state the modification(s) that you would wish to see to the Plan.

This is the only remaining opportunity to comment on the Proposed Plan. The reasons for any requested changes will be analysed and reported to Scottish Ministers. They will then appoint a person known as a Reporter to conduct a public examination of the Proposed Plan, focusing particularly on any unresolved issues and the changes sought.

Ministers expect representations (or responses) to be concise (no more than 2000 words) and accompanied by limited supporting documents. It is important to ensure that all of the information that you wish to be considered is submitted during this consultation period as there is no further opportunity to provide information, unless specifically asked.

Please email comments to ldp@aberdeenshire.gov.uk or send this form to reach us by 17 July 2020.

We recommend that you keep a copy of your representation for your own records.

Modification that you wish to see (please make specific reference to the section of the Proposed Plan you wish to see modified if possible, for example Section 9, paragraph E1.1):

Site GR015 – South of Insch Railway Station, Insch

Reason for change:

Our client has been very concerned to see the above-mentioned site go from Reserved, but not preferred for immediate development, in the Main Issues Report, to being removed completely in the Proposed Aberdeenshire Local Development Plan.

The bid made envisaged an allocation which would see the natural growth of Insch in a southerly direction and would provide approximately 60 units as two phases: Phase 1 on the lower slope (providing 35 units) working up slope to Phase 2 (providing 25 units) with a 25% proportion delivered as affordable housing on site. The bid further included an area of employment land and a much needed new car park for Insch railway station providing disabled access to the southerly platform. It is our understanding that Network Rail fully supported the proposed car park which would have enhanced the existing railway station facilities making it more attractive to users, thereby enhancing the sustainable transport linkages. The indicative plan indicated a very carefully considered layout which included substantial areas of green space including an area for community allotments, a defensible boundary to the south of the settlement and importantly linkages to North Road, the railway station and village facilities.

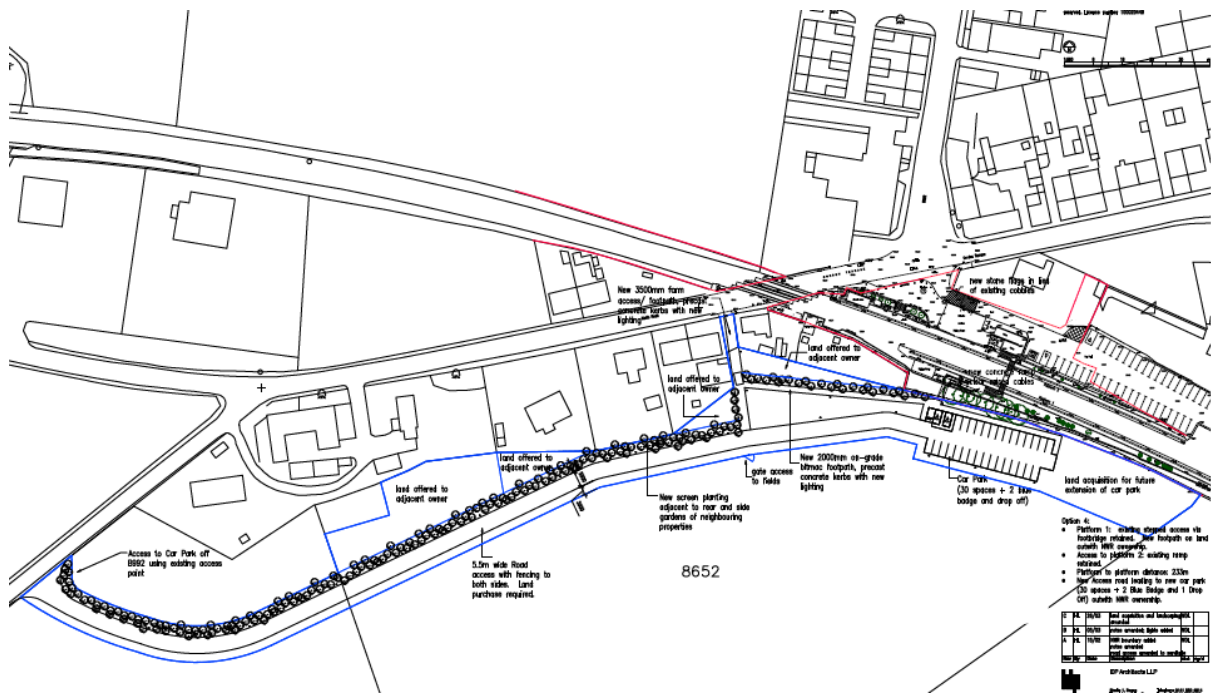

The site had been identified as far back as the Main Issues Report 2013.

It was noted that the site was "*well located, adjacent to the train station. Part of the site is prime agricultural land; however there are no significant constraints..... However it is considered that this site could be considered more favourably if there was mixed element incorporating employment or business*".

The bid sought to address these concerns and was presented as a mixed-use site. An important part of the delivery of this site allows for the long-awaited improvements to Insch Railway station as Insch is considered one of the least accessible stations in Scotland

Nestrans have submitted an “Initial Appraisal: case for Change” to Transport Scotland to undertake further work on accessibility issues at Inch station, following a study undertaken last year which engaged with several stakeholders, including a public consultation event.

The formation of new car park south of Platform 1 was identified as an option to improving access and a draft layout proposed – see below.

By way of background, the bid is made by [REDACTED] (*John Stuart Murrial Ltd*), who are keen to ensure that the proposal bring some significant community benefit and delivering a number of community aspirations. The site directly adjacent to the settlement boundary and benefits from a sustainable location, which can be enhanced through footpath links from the site to the railway station, thereby encouraging people to travel by train. The site sits adjacent to the core of the village with the railway station immediately to its north boundary. The bid included the delivery of additional car parking for Inch Railway Station, which is noted as one of the Planning Objectives for the village, notably “to improve accessibility at Inch Railway Station”, this allocation can help to deliver disabled access to the southern platform. The site owners are aware of small local business who may be interested in the Employment allocation of this site. Further, they are keen to promote volunteer and community interests, such as the establishment of a farm shop/coffee shop or to make business space available to the voluntary sector.

For the reasons given above, we ask that consideration be given to bringing forward the delivery of this site with its potential for vital community infrastructure, into the next Plan period.
