

PROPOSED ABERDEENSHIRE LOCAL DEVELOPMENT PLAN 2020 RESPONSE FORM

As part of the production of the Local Development Plan, a 'Main Issues Report' was published in January 2019. The responses from these consultations have helped to inform the content of the Proposed Local Development Plan ("the Proposed Plan").

The Aberdeenshire Local Development Plan will direct decision-making on land-use planning issues and planning applications in Aberdeenshire for the 10-year period from 2021 to 2031. The Proposed Plan was agreed by Aberdeenshire Council in March 2020 as the settled view of the Council. However, the Proposed Plan will be subjected to an independent examination and is now open for public comment.

This is your opportunity to tell us if anything should be changed in the Proposed Plan, and why.

When writing a response to the Proposed Plan it is important to specifically state the modification(s) that you would wish to see to the Plan.

This is the only remaining opportunity to comment on the Proposed Plan. The reasons for any requested changes will be analysed and reported to Scottish Ministers. They will then appoint a person known as a Reporter to conduct a public examination of the Proposed Plan, focusing particularly on any unresolved issues and the changes sought.

Ministers expect representations (or responses) to be concise (no more than 2000 words) and accompanied by limited supporting documents. It is important to ensure that all of the information that you wish to be considered is submitted during this consultation period as there is no further opportunity to provide information, unless specifically asked.

Please email comments to ldp@aberdeenshire.gov.uk or send this form to reach us by 31 July 2020*.

We recommend that you keep a copy of your representation for your own records.

**UPDATE 16 June 2020: Consultation period was extended from 17 July 2020 for a further two-week period.*

We will publish your name as the author of the comment, but will not make your address public.

Modification that you wish to see (please make specific reference to the section of the Proposed Plan you wish to see modified if possible, for example Section 9, paragraph E1.1):

Appendix 7C Settlement Statements – Formartine: Potterton section

On Page 476 under the heading Flood Risk I wish to include the words:

OP1 and OP2 lie within SEPA's 1 in 200 year flood risk area and are located outwith the boundary of the settlement of Potterton. Therefore these areas are not suitable for development.

Reason for change:

The Aberdeenshire Flood Risk Assessment (April 2020) states that Category 3 Areas (1 in 200) outwith settlements are generally not suitable for additional development including residential development. OP1 and OP2 are outwith the boundary of the settlement of Potterton. They should not be built on and it would be irresponsible to insist on including them for development in the LDP.

The British Geological Survey map of the UK shows the geology of both fields proposed for development as on bedrock of the Belhelvie troctolite basic intrusion which is impermeable to water. Therefore the drainage is poor, so that dips in the land flood during heavy rain. There are areas at risk on the proposed site including dips in the ground which currently fill with water and areas of swampy ground with reeds. This problem could only be increased by buildings and hard surfaces which would not allow drainage of water into the soil during heavy rains. I believe this would endanger the existing homes in the small settlement of Milton of Potterton which lies lower down than the fields proposed for development and it is a real concern for ourselves and our neighbours, especially with increases in flooding being seen around the country due to climate change. This is recognised in para 6.2 of the Strategic Development Plan which states 'Development which **avoids** areas of flood risk...will be important in adapting to climate change.' These fields are in an area of flood risk and should not be built on.

In the area and its surroundings the water table is high and there are several natural springs. There are problems with drainage and run off from the fields in periods of heavy rain. The road junction at Mill of Potterton can flood after only a short period of heavy rain, the upgraded drainage pumping system gets swamped and causes pollution to the Millden Burn and thereafter to the sea. In fact, this has happened with SEPA needing to become involved within the last few weeks.

I believe that further development in this area would increase flood risk in the surrounding area and cause serious environmental pollution with consequent impact on biodiversity.
