I write in reference to the plans to build 250+ new houses at Potterton.

I object to this plan and any plan that will interject in to the Greenbelt land that has previously been around the village of Potterton. There are not sufficient road infrastructure or sewage infrastructure to support this amount of extra dwellings and inhabitants, also, there is the matter of the Natural characteristic of the village which will be ruined by large scale development in this area.

We live in this village because we enjoy the community feel to the village and the peace and quiet as well as the beauty of the area, we do not wish to see it spoiled and opened up to constant development and become the size of Balmedie within a few years.

Sincerely

Paul Cairns
