Good Afternoon

We wish to comment on [REDACTED] gaining another potential 10 years planning for the above site . He has walked away from the site in question twice , it's now being used as a dump for his building materials and the prospect of many more years of the same is horrendous for the residents . The existing residents can't sell their houses due to the mess of the site and we would rather planning was revoked than live with the perpetual mess . He is a irresponsible builder with no concern for the site other than use it as a dump

Yours

Bryan & Carol Garden
