# PROPOSED ABERDEENSHIRE LOCAL DEVELOPMENT PLAN 2020 RESPONSE FORM

As part of the production of the Local Development Plan, a 'Main Issues Report' was published in January 2019. The responses from these consultations have helped to inform the content of the Proposed Local Development Plan ("the Proposed Plan").

The Aberdeenshire Local Development Plan will direct decision-making on land-use planning issues and planning applications in Aberdeenshire for the 10-year period from 2021 to 2031. The Proposed Plan was agreed by Aberdeenshire Council in March 2020 as the settled view of the Council. However, the Proposed Plan will be subjected to an independent examination and is now open for public comment.

## **This is your opportunity to tell us if anything should be changed in the Proposed Plan, and why.**

When writing a response to the Proposed Plan it is important to specifically state the modification(s) that you would wish to see to the Plan.

This is the only remaining opportunity to comment on the Proposed Plan. The reasons for any requested changes will be analysed and reported to Scottish Ministers. They will then appoint a person known as a Reporter to conduct a public examination of the Proposed Plan, focusing particularly on any unresolved issues and the changes sought.

Ministers expect representations (or responses) to be concise (no more than 2000 words) and accompanied by limited supporting documents. It is important to ensure that all of the information that you wish to be considered is submitted during this consultation period as there is no further opportunity to provide information, unless specifically asked.

Please email comments to [ldp@aberdeenshire.gov.uk](mailto:ldp@aberdeenshire.gov.uk) or send this form to reach us by 31 July 2020\*.

We recommend that you keep a copy of your representation for your own records.

*\*UPDATE 16 June 2020: Consultation period was extended from 17 July 2020 for a further two-week period.*

COUNCIL

# YOUR COMMENTS

Please provide us with your comments below. We will summarise comments and in our analysis will consider every point that is made. Once we have done this we will write back to you with Aberdeenshire Council's views on the submissions made. We will publish your name as the author of the comment, but will not make your address public.

**Modification that you wish to see** (please make specific reference to the section of the Proposed Plan you wish to see modified if possible, for example Section 9, paragraph E1.1):

## **Section 7, page 35, Policy R3 Minerals, paragraph R3.1**

PROPOSED LDP TEXT: We will only allow minerals development where sufficient information is provided to enable the full likely effects of the development to be assessed, together with proposals for appropriate control, mitigation and monitoring.

At a minimum the following information must be provided to support the application:

- details of phased working;
- waste management;
- land restoration and aftercare, including details of the timescales for such works;
- details of the proposed use of the site after completion of the works. It is generally expected that all minerals developments will be fully restored to its previous use unless an alternative use is outlined at the outset; and
- public road maintenance and restoration. This will require to be agreed with the Planning Authority before any planning application is approved.

MODIFICATION: The modification we wish to see would include 2 additional bullet points and a statement specifically on peat extraction. Text is suggested below with additional text shown in bold:

"We will only allow minerals development where sufficient information is provided to enable the full likely effects of the development to be assessed, together with proposals for appropriate control, mitigation and monitoring.

At a minimum the following information must be provided to support the application:

- **An environmental statement**
- **A carbon impact assessment**
- details of phased working;
- waste management;
- land restoration and aftercare, including details of the timescales for such works;
- details of the proposed use of the site after completion of the works. It is generally expected that all minerals developments will be fully restored to its previous use unless an alternative use is outlined at the outset; and
- public road maintenance and restoration.

This will require to be agreed with the Planning Authority before any planning application is approved.

**New commercial peat extraction sites will not be permitted and there is a presumption against the renewal of permission on existing sites.**

## Reason for change:

We believe that the addition of the bullet point “an environmental statement” would make it clear to potential applicants that this is part of the minimum requirement to support an application and would link to paragraph R3.2 of the policy, which we welcome and which states, “in all cases an environmental statement will have to show acceptable environmental impacts of the mineral development”. Without the inclusion of this bullet point there may be some ambiguity as to what is required to support the application and perceived conflict with section R3.2 of the policy.

We also believe that a carbon impact assessment is required to understand how such developments comply with sustainable development goals and the commitment to meet Scotland’s climate change targets.

We strongly believe that the policy should make it clear that there is a presumption against peat extraction, and we have suggested wording at the end of the existing proposed policy to state, “New commercial peat extraction sites will not be permitted and there is a presumption against the renewal of permission on existing sites”.

Aberdeenshire Council also has a duty (under section 44 of the Climate Change (Scotland) Act 2009) to deliver their functions in such a way as to support Scotland’s achievement of net zero emissions by 2045, and the interim targets as specified in the Climate Change (Scotland) Act 2009. Peat extraction is unsustainable and contrary to the achievement of national climate change targets. While peat can act as an extremely effective carbon store, if it is disturbed it can become a net producer of CO<sub>2</sub>. Paragraph 205 of Scottish Planning Policy which state that “Where peatland is drained or otherwise disturbed, there is liable to be a release of CO<sub>2</sub> to the atmosphere. Developments should aim to minimise this release”.

The recognition of the importance of healthy peatland has been underlined recent budget commitments by the Scottish Government to invest £250+ million in peatland restoration over 10 years<sup>1</sup>, whilst the UK Committee on Climate Change (CCC) recently called for a ban on the extraction of peat<sup>2</sup>.

The inclusion of this sentence as suggested would give clarity for commercial developers and the public that such developments would not be supported and would be in line with Aberdeenshire Council’s climate change duties and other policies in the proposed plan which seek to deliver a low carbon place.
